Fairway Technology  
( Dec 2024 )

## Education

- **B.Sc Computer Science**  
Dagon University | 2018-2025

## Projects

- **Car Dealership Platform**  
Built with React.js, specializing in buying, selling, and trading new and used car.  
Features include dynamic car filtering, routing with React Router, responsive design, and a seamless user experience.
- **Outfit Recommendation with Machine Learning**  
Developed as a school project, uses Django to provide personalized clothing suggestions by applying content-based filtering technique.  
It features dynamic filtering, a like system, and seamless interactions with a responsive design.
- **Blog Website**  
Built with Laravel, featuring functionalities for creating posts, adding comments, editing posts, and deleting comments.  
Offers a user-friendly interface and efficient content management.
